

EXTRICATION FIRE GEAR

PLEATED SHOULDERS

Movement. Flexibility. Maneuverability. These shared qualities of Lakeland's Extrication gear improve comfort, mobility, and performance when seconds matter.

LAZERMAX™ TRIM

Lakeland's patented silver reflective seam helps firefighters stand out and stay safe on the scene of an emergency. Maximize your nighttime visibility with reflective trim piping.

ERGONOMIC CUT AND ATHLETIC FIT

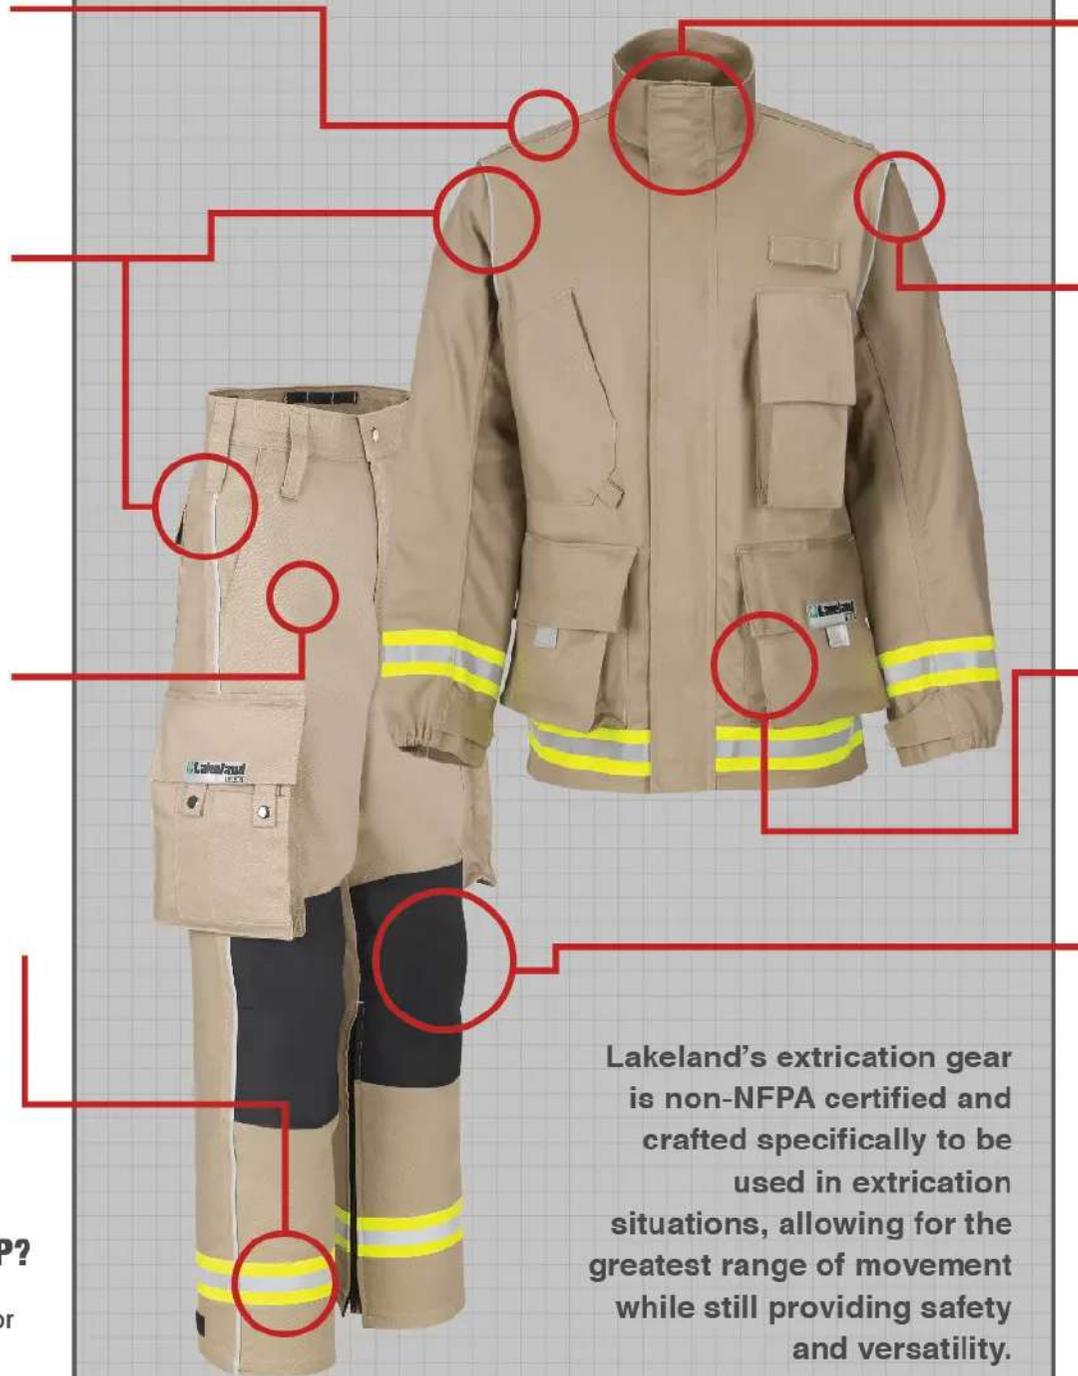

Comfort on the job is a requirement - one that Lakeland® takes seriously. That's why all of our firefighter gear includes the same ergonomic cut and athletic fit. Stay nimble, stay comfortable, with Lakeland's enhanced features.

2" REFLECTIVE TRIPLE TRIM

Stay visible and stay safe with the unique combination of LazerMax™ Trim from Lakeland® with 2" Reflective Triple Trim.

ARE YOU READY TO #GEARUP?

Take the next step and contact Lakeland to request a consultation or product demonstration.

STAND-UP COLLAR WITH OVERLAPPING STORM FLAP

Keep your neck and face protected with a stand-up collar and overlapping storm flap with Zipper and Velcro® Front Closures designed specifically with comfort in mind.

PLEATED, ERGONOMICALLY CURVED SET-IN SLEEVES

Maximum mobility and reach start with good shoulder and sleeve construction. A pleated, ergonomically curved set-in sleeve means improved movement with less restriction.

STRATEGIC STORAGE. EVERYWHERE.

When you arrive at the emergency scene, be prepared with the tools you need in Lakeland's plentiful pockets, including expansion pockets with Scotchlite™ Reflective Material pull-tabs, a radio pocket with mic strap, as well as a stethoscope and utility pocket.

PADDED POLYMER BACK COATED PARA-ARAMID KNEE REINFORCEMENT

A well-constructed, padded knee makes all of the difference when you are tasked with working at ground level. Stay comfortable and improve maneuverability with this reinforced knee design.

Lakeland's extrication gear is non-NFPA certified and crafted specifically to be used in extrication situations, allowing for the greatest range of movement while still providing safety and versatility.
