

Product Specifications

Model: CPX-15 Centerpost Extension, 15" Effective Height

The Pelsue Model #CPX-15 Centerpost Height Extension is designed to be utilized in conjunction with a Pelsue DK Series Davit kit and a Pelsue DS Series Davit Sleeve. The CPX-15 is intended to provide 15" of additional height to the DK Series davit when it is required for extraction or for clearance over obstructions such as handrails or walls.

General Specifications:

The Pelsue Model #CPX-15 is only intended for usage in conjunction with a Pelsue DK Series Davit and a Pelsue DS Series Sleeve. When installed and utilized properly (refer to "Mounting Requirements" on this document) , the #CPX-15 will meet or exceed the capabilities and ratings of the accompanying davit and sleeve.

Materials & Construction:

General Construction..... Welded Steel
Finish.....Powdercoat

Weight:

Weight17LBS. (7.7 Kg)

Mounting Requirements:

- **Warning!** The Model #CPX-15 must not be used in combination with multiple CPX series extensions of any size. The use of more than one extension simultaneously to increase the davit's height is not permitted.
- **Warning!** All CPX Series extensions are only approved for usage within Pelsue DS Series Fixed Sleeves. CPX Series extensions are not intended for usage within any Pelsue "portable" style davit base.
- **Warning!** All CPX Series extensions are approved for usage with davits having a maximum offset of 24" (i.e. DK1824). The usage of CPX Series extensions with davits having greater than a 24" offset is not permitted.
- **Warning!** The DK Series davit must be completely installed within the CPX Series extension, having the centerpost's swivel stop nested in the slot in the socket wall, prior to the application of any load upon the system.
